Introduction by Prof Lyn Gilbert

AUSTRALASIAN SOCIETY FOR
 INFECTIOUS DISEASES 2002

This invaluable publication provides an approach to the management of 14 infections during pregnancy and the perinatal period. The algorithms follow a set of themes which include clinical and microbiological diagnosis, perinatal transmission risks and available intervention strategies. It represents a consensus among Australasian specialists in perinatal infection and has been endorsed by the Australasian Society for Infectious Diseases (ASID) and the Royal College of Obstetricians and Gynecologists of Australia and New Zealand.

The book is intended to help guide the initial assessment and investigation of the patient, rather than discourage nonspecialists from referring pregnant women with suspected infection during pregnancy.

Copies of Management of Perinatal Infection can be ordered now for **\$40** each incl. GST, postage & handling (extra postage may be charged for overseas orders).
